NEW on clinerion.com: Live updates on Patient Network Explorer's global hosptital network coverage

We've updated our website homepage with realtime statistics from our global Patient Network including a dynamic map searchable for disease indications. Users may search the live "heatmap" to see prevalence of searchable disease indications by ICD10 code. Real-time statistics - including the number of countries, sites and patients from Clinerion's international network of partner hospitals - are also now displayed!

Read more about our new heatmap and statistics >

Clinerion is Growing!

Clinerion has moved to new, larger offices in Basel! We needed the space, as our business has been growing, and so has our team, matching the expansion in our international network of partner hospitals.

Our new address is Elisabethenanlage 11, 4051 Basel, Switzerland.

[Read more about our expansion and move >](#)

More expansion news below. Meanwhile, here are some pictures from our housewarming party. Thanks to all the guests who helped us inaugurate our new premises! In particular, thank you to Thomas Brenzikofer of BaselArea.swiss and Co-Founder of the DayOne Initiative, who spoke on the strengths of the Basel life sciences ecosystem in driving healthcare innovation.

Partner News

Clinerion and S4 research are partnering in India!

Clinerion and S4 Research announce a partnership to expand the global network of hospitals on the Clinerion's Patient Network Explorer platform into India. International pharmaceutical companies will be able to match their leading-edge clinical trials to patients in India.

Digital Technologies in Clinical Research Networks - Clinical Connectivity (International Clinical Trials)
Publication date: November, 2018

International Clinical Trials asked for our thoughts on how digital and cloud technologies are impacting clinical trials. Our article is now published!

"Using modern digital technologies, today's research networks are embracing new ways of more intimate collaboration and constructive improvisation to increase the speed and quality of clinical research"

This article is taken from International Clinical Trials November 2018, pages 22-25. © Samedan Ltd.

Clinerion is Expanding!

New Team Member

Recently, we have been delighted to welcome another new member of our team. Welcome, José!

José Andrés Cordero Benítez
Software Developer, in the Basel Office.

Job opening: Junior Java Developer for Data

Integration and Processing Tasks

The Junior Java Developer for Data Integration and Processing Tasks will support the installation team in connecting hospitals to Patient Network Explorer. They will extract data from different kinds of databases installed in various healthcare organizations located all over the world and send it to other systems via webservices using clients. The successful candidate will communicate with developers from our partner organizations to understand the database/messaging structure and then extract the data.
