

Dear {{ insert first\_name  
'default=Colleague' }},

#### BIG news for our latest Clinerion Courier!

Thrilled to lead off this edition with a few major pieces of news. Clinerion's global network now covers 409 M patients. And the patent for our de-identification technology, ANID, has been published.

We have not been resting on our laurels – we have a lot more activities to support clinical research and leverage real-world data to update you on, including a new white paper on identifying undiagnosed rare disease patients through use of EHR and AI/ML, and contributing proposals for the betterment of clinical research in Poland.

Our first two Clinerion RoadShow events, in Bosnia and Brazil, were huge successes; we are continuing with more dates and locations. And, of course, we continue to expand as a company!

Lastly: International Clinical Trials Day will be celebrated as usual on May 20th, this year, and it's a good opportunity to remind ourselves why we do what we do: to get better treatments out and improve the lives of patients around the world.

#### BREAKING NEWS

**409 M**

**Clinerion's Coverage Reaches 409 M Patient Lives**

"A great achievement and a big milestone for Clinerion! I am proud of my amazing team. Within our global, federated network, we now have 409 M patient lives available for clinical research. We are ready to help overcome diversity and inclusion challenges. Let's all work together to enable more patients to benefit from innovative treatments and to provide better patient outcomes." - Barış Erdogan, Clinerion CEO.

**ANID**

**Clinerion's ANID Technology Gains Patent Protection**

Clinerion's revolutionary ANID technology for de-identification and identification of patient record data – a core feature in our Patient Network Explorer – is now patent protected!

#### Clinerion Publications

**White Paper: Diagnosing Rare Diseases with Electronic Health Records**

Presenting Clinerion's latest white paper, showcasing our work on identifying undiagnosed rare disease patients by modelling disease-specific phenotypes through use of Patient Network Explorer, our global patient Electronic Health Record network and Artificial Intelligence/Machine Learning technologies, by Sinan Findik, Douglas Drake, Baris Erdogan and Le Vin Chin.

**Report: Industry Clinical Trials in Poland. Possibilities to increase number and scope of trials in Poland**

Did you know that Clinerion has significant coverage in Poland? We recently contributed to this report, sponsored by the Polish Association of Innovative Pharmaceutical Companies (INFARMA) and the Polish Association for Employers of Contract Research Organizations (POLCRO).

Clinerion's Douglas Drake contributed a chapter on "Harnessing the Power of Electronic Health Records to Increase Speed and Precision of Clinical Trials."

#### International Clinical Trials Day 2022

**How a watered-down cocktail beat Napoleon Bonaparte**  
by Douglas Drake

How did a watered-down cocktail beat Napoleon Bonaparte? We celebrate International Clinical Trials Day 2022 with Douglas Drake revisiting James Lind's original clinical trial through a (slightly irreverent) modern lens. Enjoy!

#### Upcoming Events

**Clinerion RoadShows**

Clinerion is coming to meet you! Throughout 2022, we are running roadshows to meet the hospitals and trial sites in our network and to introduce ourselves to potential new members! Where we have hospital sites already, we are also looking forward to bringing sponsors along for mutual introductions! Watch out for more on our plans: we have already started planning our next stops in Brazil (again), the Middle East, and Spain ...
