

PRESS RELEASE

Basel, Switzerland, June 4th, 2020.

Clinerion gains ISO/IEC 15504 (SPICE) certification.

Clinerion has gained ISO/IEC 15504 (SPICE) certification, the international standard that describes a framework for assessment of software development processes.

ISO/IEC 15504 Information technology – Process assessment, also known as SPICE (Software Process Improvement and Capability dEtermination) is an international norm to assess and evaluate the maturity of business processes for software and electronic development. A process reference model defines the central processes relevant to be inspected and to be performed in any software/embedded system development. The process assessment model defines how to evaluate the capability of processes within an organization, covering the business areas of organization, management, engineering, acquisition and supply, support and operations.

Clinerion was assessed by and received ISO/ICE 15504 (SPICE) certification from the certification organization ICT Certify Test and Certifications Ltd.

“This certification is a great validation of the vital importance Clinerion places on having rigorous and meaningful business processes, in support of our work developing our software and services for the future,” says Barış Erdoğan, Vice President Site & Patient Networks, Clinerion. “Clinerion has been on this journey for a while, recently gaining ISO 27001:2013 certification, confirming that we are following best practice information security principles.”

About Clinerion

Clinerion accelerates clinical research and medical access to treatments for patients. We use proprietary technologies for analysis of patient data from our global network of partner hospitals. Clinerion's Patient Network Explorer radically improves the efficiency and effectiveness of clinical trial recruitment by offering data-driven protocol optimization, site feasibility evaluation and real-time patient search and identification to match patients to treatments. Our technology solution provides real-world evidence analytics for medical access. Clinerion facilitates the participation of partner hospitals in leading-edge, industry-sponsored trials and time savings in patient

recruitment. We create innovative and disruptive fit-for-purpose solutions which enable pharmaceutical companies to shorten patient recruitment and save costs by streamlining operations and leveraging strategic intelligence. Clinerion's proprietary Big Data analytics technologies leverage real-time data from electronic health records which comply with international patient privacy and data security regulations. Clinerion is a global data technology service company headquartered in Switzerland.
