

PRESS RELEASE

Basel, Switzerland, June 11th, 2020.

EVEX Hospitals joins Clinerion's Patient Network Explorer platform and enables patient access to increased options for healthcare treatment in Georgia.

EVEX Hospitals joins the international hospital network on Clinerion's Patient Network Explorer platform, bringing their patients to the attention of researchers and trial sponsors who are recruiting for clinical trials. This offers the hospitals' patients' earlier access to leading-edge treatments and medications in Georgia.

EVEX Hospitals is the group member of Georgia Healthcare Group (GHG). GHG is the largest healthcare service provider in Georgia, with 23% market share by number of referral hospitals and community clinics beds (3,320). GHG offers the most comprehensive range of inpatient and outpatient services through an integrated network of hospitals and clinics equipped with state-of-the-art equipment. EVEX Hospitals has a strong background in running clinical trials, with high integrity data; productive, reliable site operations; rapid country and site startup; and established ethics compliance standards across its sites.

Joining Patient Network Explorer, EVEX Hospitals' patients and their treating physicians gain increased treatment options and quicker access to new medical interventions. Patients will be matched to clinical studies according to their electronic health records, ensuring better screening when recruiting for clinical trials. Trial managers gain the ability to include eligible patients for trials more quickly and efficiently than before.

"We are pleased with our strong expansion in Georgia, which means we have a good representation and coverage of the country," says Ian Rentsch, CEO of Clinerion. "This makes the services that we offer for Georgia more statistically meaningful to researchers and clinical trial managers at Pharma sponsors and CRO."

About Clinerion

Clinerion accelerates clinical research and medical access to treatments for patients. We generate real-world data from our global network of partner hospitals for Real World Evidence analyses. Clinerion's Patient Network Explorer radically improves the efficiency and effectiveness of clinical trial recruitment by offering data-driven protocol optimization, site feasibility evaluation and real-time patient search and identification to match patients to treatments.

Clinerion facilitates the participation of partner hospitals in leading-edge, industry-sponsored trials and time savings in patient recruitment. Researchers gain access to real-time, longitudinal patient data from electronic health records for analysis. We enable pharmaceutical companies, CROs and SMOs to shorten patient recruitment and save costs by streamlining operations and leveraging strategic intelligence. Clinerion's proprietary technologies comply with international patient privacy and data security regulations. Clinerion is a global data technology service company headquartered in Switzerland.

About EVEX Hospitals

EVEX Hospitals and EVEX clinics are organized in specific geographical clusters to provide medical services and high-quality care to the largest range of patients through:

- polyclinics – offering outpatient services;
- community clinics – offering broader outpatient services and a limited range of inpatient healthcare services; and
- referral hospitals – offering a comprehensive range of complex inpatient and specialist services.

The referral hierarchy within each geographical cluster provides patients with a complete and convenient treatment pathway, from local physicians in polyclinics and community clinics to referral hospitals. Our 86 specialist ambulances help achieve this by facilitating the movement of patients to and between our hospitals. While we provide basic ("primary") medical and surgical procedures at all our facilities, the majority of more specialized or advanced ("secondary" and "tertiary") interventional and surgical procedures are concentrated in our regional referral hospitals.

The company has strong corporate governance; standardized processes; safety and quality standards and its own personnel training center. Hospitals provide the latest treatments using technologically advanced equipment and the most up-to-date infrastructure.

EVEX Hospitals has a strong background in managing clinical trials. It has established a benchmark in terms of ethics compliance and standards across its sites. First-class leaders of our medical team are driving the improvement of service quality and access of patients to healthcare across the organization. High integrity data; productive, reliable site operations; rapid country and site startup make EVEX Hospitals the preferred clinical trial site supplier.
