

PRESS RELEASE

Basel, Switzerland, April 29th, 2019.

Clinerion partners with Bioforum to expand coverage of Patient Network Explorer and offers its services into Israel and Australia.

Bioforum the Data Masters will bring the real-world data solutions of Clinerion's Patient Network Explorer platform to patients and physicians in Israel and Australia, accelerating the development of innovative medications and improving access to new treatments.

Bioforum is a data-focused Contract Research Organization (CRO), offering a wide range of consulting services, including medical writing, data management and bio-statistical support.

Bioforum will support Clinerion by leveraging its extensive network to enlarge Clinerion's outreach in Bioforum's target markets of Israel and Australia. Bioforum will also identify potential customers for Clinerion's services, which enable pharmaceutical trial sponsors to more accurately refine trial protocol criteria and then quickly find and match their trials to sites and patients, accelerating the set-up phase of trials by months.

"We are extremely excited to launch this collaboration and are confident that together we can promote clinical research in our target markets. We are keen to introduce more medical centers to Clinerion's advanced technology," says Bioforum's President & Co-Founder, Mr. Amir Malka.

"Patients in both Israel and Australia are underserved by clinical research at the moment," says Ian Rentsch, CEO of Clinerion. "We are pleased to have Bioforum on board to support bringing our solutions to market."

About Clinerion

Clinerion accelerates clinical research and medical access to treatments for patients. We use proprietary technologies for analysis of patient data from our global network of partner hospitals. Clinerion's Patient Network Explorer radically improves the efficiency and effectiveness of clinical trial recruitment by offering data-driven protocol optimization, site feasibility evaluation and real-time patient search and identification to match patients to treatments. Our technology solution

provides real-world evidence analytics for medical access. Clinerion facilitates the participation of partner hospitals in leading-edge, industry-sponsored trials and time savings in patient recruitment. We create innovative and disruptive fit-for-purpose solutions which enable pharmaceutical companies to shorten patient recruitment and save costs by streamlining operations and leveraging strategic intelligence. Clinerion's proprietary Big Data analytics technologies leverage real-time data from electronic health records which comply with international patient privacy and data security regulations. Clinerion is a global data technology service company headquartered in Switzerland.
