The International Clinical Trials Network (ICN) adopts Clinerion's PRS

ICN International Clinical Trial Center Network
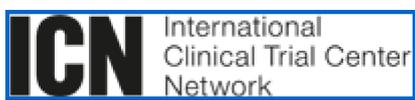

We are thrilled to announce the adoption of Clinerion's Patient Recruitment System (PRS) as an official service by the International Clinical Trial Center Network (ICN), the network of top-tier clinical research institutions, worldwide. PRS brings automated medical informatics solutions for protocol design, site selection and patient recruitment to members of the ICN.

You can read the full text of our announcement here.

Webinar: EHR-Driven Patient Recruitment Has Arrived!

SCRS | Our Voice. Our Community.
Society for Clinical Research Sites
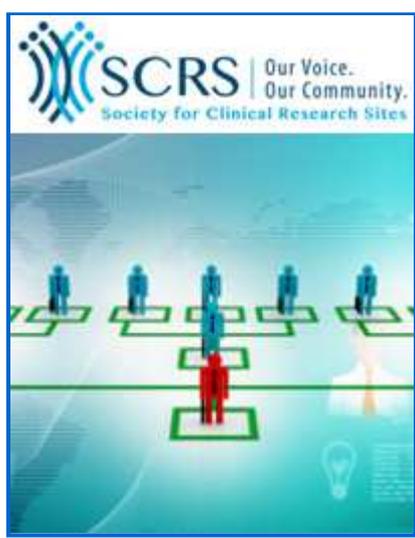

Could the non-recruiting site be a thing of the past? Faster and more efficient recruitment mechanisms can lead to significantly more patients being enrolled. New patient recruitment technology can potentially identify 10 to 30 times more 'real world' patients than those found through manual screening, in a matter of minutes instead of weeks or months. Join Clinerion's Randy Ramin-Wright at this Society for Clinical Research Sites webinar, which explores ways of using Big Data to find your perfect patient and help solve the challenge of recruiting anonymous patients.

Let your data speak for itself and start attracting more studies today! Register here.

Clinerion has been out and about a lot in the past two months, putting the story out on how our PRS can help beat clinical trial enrollment timelines by doing real-time patient search on hospital e-records.

We attended the DIA's 28th Annual EuroMeeting in Hamburg, in early April; then demonstrated PRS live from our booth at the UK e-Health Week, in London, later that month. There, our Head of Sales, Tigran Arzumanov, also gave a presentation, entitled "Needle in a Server Stack – clinical trial patient recruitment using multi-hospital EHR integration." At the same time, our colleagues were also at Clinical Trials in Central and Eastern Europe, in Warsaw, and conhIT, in Berlin.

All very valuable experiences, in which we had the great honor and opportunity to meet you all and learn about the issues you're facing – and find ways that our solutions can help.

Next Up …

We're maintaining our busy schedule … Come talk to us at any of the following upcoming events! Contact us, if you'd like to book an appointment.

Clinerion will host a roundtable at Big Data Leaders Europe, in London, May 23-24. Clinerion's CTO, Dominik Aronsky, will lead a discussion on "Leveraging Big Data for Improved Clinical Trial Design and Performance" at 11.45 a.m. on the first day, Monday, May 23.

Clinerion will also be attending the HIMSS Europe eHealth Week 2016 in Amsterdam, June 8-10, and the DIA 2016 Annual Meeting, in Philadelphia, PA, June

26-30. Then, we will have a stand at Becker's Hospital Review's 2nd Annual CIO/HIT + Revenue Cycle Conference in Chicago, IL, July 27-28.

At the end of August, we will exhibit and speak at HEC 2016 (Health – Exploring Complexity: An Interdisciplinary Approach) in Munich, August 28-September 2, 2016. This will be a joint meeting for various German and European associations: GMDS, DGEpi, IEA-EEF, EFMI – and the first time they all come together for one meeting!

In September, we will have a booth at Pink Ribbon's 3rd Breast Cancer Forum (run in association with the Royal Society of Medicine), in London, September 16-17, 2016.

And that's just the Summer! Do contact us, if you'd like to arrange an appointment for a chat at any of these events!
