

Dear Colleague,

### The Power of Clinerion Real World Data!

Over Summer, we at Clinerion have been continuing our hard work to keep expanding our global patient network coverage as well as our range of real-world data (RWD) solutions for clinical research and drug development!

In this edition of our newsletter, we're focusing on the scope and flexibility of the insights you can gain from our RWD. Besides queries run through Patient Network Explorer, did you know you can also get reports from us, customized to your specific enquiry?

Whether you're an epidemiologist seeking reliable data to understand diseases, or a researcher looking to understand treatments and outcomes, a health authority wanting to assess and manage risks better, a payer or HTA body needing evidence you can trust to make better decisions, or a drug developer speeding up R&D and control development costs, we can generate the precise RWD report you need – check out the details, below.

As an example, we have recently ran a project with İnönü University & AstraZeneca where we used Clinerion RWD to determine co-occurrence rates of Type 2 Diabetes (T2DM) patients with atherosclerotic cardiovascular disease (ASKVD) and ASKVD risk factors. You can find a poster summarizing the results as well, below.

With warm regards for the end of Summer,  
Your Clinerion Team
